Section 5. Fire fighting measures

Suitable extinguishing media: Foam

Carbon dioxide. Dry chemical.

Improper extinguishing media: Water spray jet

Decomposition products in case of

fire:

Thermal decomposition can lead to release of irritating gases and vapors.

carbon monoxide Carbon dioxide. Hydrocarbons.

Particular danger in case of fire: WARNING FLAMMABLE!

Contents under pressure.

Closed containers may rupture (due to build up of pressure) when exposed to extreme

heat.

Do not puncture or incinerate pressurized containers.

Special protective equipment for

fire-fighters:

Use water spray to keep fire exposed containers cool and disperse vapors.

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

Additional fire fighting advice: In case of fire, keep containers cool with water spray.

Collect contaminated fire fighting water separately. It must not enter drains.

Section 6. Accidental release measures

Personal precautions: See advice in section 8

Do not breathe solvent vapors. Ensure adequate ventilation.

Environmental precautions: Ventilate area.

Remove all sources of ignition. Do not let product enter drains.

Clean-up methods: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder,

sawdust).

Wear suitable protective clothing, gloves and eye/face protection.

Section 7. Handling and storage

Precautions for safe handling: Avoid breathing vapors or mists of this product.

Avoid contact with eyes, skin and clothing. Keep away from heat, spark and flame.

Vapors will accumulate readily and may ignite explosively.

Ensure adequate ventilation.

Conditions for safe storage: Do not handle or store near an open flame, heat or other sources of ignition.

Do not puncture, incinerate, or expose to temperatures above 48.9 °C (120 °F).

Keep away from heat and direct sunlight.

Ensure adequate ventilation.

Section 8. Exposure controls / personal protection

ignition. Switch off electrical devices. Do not smoke, do not weld. Do not empty waste

into waste water drains.

Eye protection: Wear protective glasses.

Skin protection: Wear suitable protective clothing.

Please note that in practice the working life of chemical resistant gloves may be

considerably reduced as a result of many influencing factors (e.g. temperature). Suitable risk assessment should be carried out by the end user. If signs of wear and tear are noticed

then the gloves should be replaced.

Solvent resistant gloves such as Viton, poly (vinyl alcohol), or equivalent is

recommended.
